Historical Thinking Skills

AP U.S. History requires students to think analytically and historically. Students must be able to demonstrate these thinking skills in writing. Students must also be able to make use of these skills when answering multiple choice questions.

What is Analytical Thinking?

1. **Making an assertion.**
An assertion is not necessarily an “opinion.” An assertion is a conclusion that you have reached after examining all available evidence. Additional evidence might lead you to change your conclusion.
2. **Defending an assertion with specific, accurate, and relevant information.**
3. **Anticipating and destroying counterarguments.**

What is Historical Thinking?²

Skill Type	Historical Thinking Skill
I. Chronological Reasoning	1. Historical Causation 2. Patterns of Continuity and Change over Time 3. Periodization
II. Comparison and Contextualization	4. Comparison 5. Contextualization
III. Crafting Historical Arguments from Historical Evidence	6. Historical Argumentation 7. Appropriate Use of Relevant Historical Evidence
IV. Historical Interpretation and Synthesis	8. Interpretation 9. Synthesis

² AP[®] United States History Curriculum Framework

Historical Thinking³

SKILL I – CHRONOLOGICAL REASONING

Historical Causation

Historical thinking involves the ability to identify, analyze and evaluate multiple cause-and-effect relationships in a historical context, distinguishing between the long-term and proximate. (*Why did stuff happen, and what was the impact?*)

Patterns of Continuity and Change over Time

Historical thinking involves the ability to recognize, analyze, and evaluate the dynamics of historical continuity and change over periods of time of varying lengths, as well as relating these patterns to larger historical processes or themes. (*What has stayed the same, and what has changed? Why?*)

Periodization

Historical thinking involves the ability to describe, analyze, evaluate, and construct models of historical periodization that historians use to categorize events into discrete blocks and to identify turning points, recognizing that the choice of specific dates favors one narrative, region or group over another narrative, region or group; therefore, changing the periodization can change a historical narrative. Moreover, the particular circumstances and contexts in which individual historians work and write shape the interpretations and modeling of past events. (*How and why is information organized into time periods, and what were the turning points?*)

SKILL II: COMPARISON AND CONTEXTUALIZATION

Comparison

Historical thinking involves the ability to describe, compare and evaluate multiple historical developments within one society, one or more developments across or between different societies, and in various chronological and geographical contexts. It also involves the ability to identify, compare and evaluate multiple perspectives on a given historical experience. (*How are things the same, and how are they different?*)

Contextualization

Historical thinking involves the ability to connect historical developments to specific circumstances in time and place, and to broader regional, national, or global processes. (*When and where did something happen, and what else was going on?*)

SKILL III – CRAFTING HISTORICAL ARGUMENTS FROM HISTORICAL EVIDENCE

Historical Argumentation

Historical thinking involves the ability to define and frame a question about the past and to address that question by constructing an argument. A plausible and persuasive argument requires a clear, comprehensive and analytical thesis, supported by relevant historical evidence — not simply evidence that supports a preferred or preconceived position. Additionally, argumentation involves the capacity to describe, analyze and evaluate the arguments of others in light of available evidence. (*What position should I take on a historical question, and what evidence will support my position?*)

Appropriate Use of Relevant Historical Evidence

Historical thinking involves the ability to identify, describe and evaluate evidence about the past from diverse sources (including written documents, works of art, archaeological artifacts, oral traditions and other primary sources), with respect to content, authorship, purpose, format, and audience. It involves the capacity to extract useful information, make supportable inferences and draw appropriate conclusions from historical evidence while also understanding such evidence in its context, recognizing its limitations and assessing the points of view that it reflects. (*How reliable is the evidence that supports my position?*)

SKILL IV: HISTORICAL INTERPRETATION AND SYNTHESIS

Interpretation

Historical thinking involves the ability to describe, analyze, evaluate, and create diverse interpretations of the past — as revealed through primary and secondary historical sources — through analysis of evidence, reasoning, contexts, points of view, and frames of reference. (*What are the various explanations of what happened?*)

Synthesis

Historical thinking involves the ability to arrive at meaningful and persuasive understandings of the past by applying all the other historical thinking skills, by drawing appropriately on ideas from different fields of inquiry or disciplines, and by creatively fusing disparate, relevant (and perhaps contradictory) evidence from primary sources and secondary works. Additionally, synthesis may involve applying insights about the past to other historical contexts or circumstances, including the present. (*Can I bring together various perspectives and pieces of information to explain my historical assertion? For example, can I relate Jim Crow to imperialism when writing about the 1890s?*)

Understanding the Study Guides

In a Nutshell

The information in this section will help you understand the bigger picture of what you will be learning in this time period.

Key Concepts

The information in this section, grouped as distinct “concepts,” is taken from the *AP[®] United States History Curriculum Framework*, a book for teachers that outlines the essential information that students should learn in an AP U.S. History class. Read this section before you begin studying the time period.

Significant Topics

- The “**numbered**” topics under “Significant Topics” provides information about topics you will study in your textbook and the lessons provided by your teacher. The description of each topic comes from the *AP[®] United States History Curriculum Framework*. All this information should be studied, examined, and committed to memory (as much as possible) before you take the AP exam in May.
- The “**lettered**” information under “Significant Topics” provides “illustrative knowledge” that can be used as evidence to support the assertions you make regarding each topic. It is recommended that you print the time period you are studying on paper and write short descriptions of “lettered” items. Your teacher might ask you to skip some of the information provided in this study guide. Your teacher might also ask you to examine **additional information** for each topic. (Space is provided at the end of each time period for additional information.)

Information for Teachers

- These Study Guides were designed to help teachers create an accessible survey of U.S. history that conforms to the *AP[®] United States History Curriculum Framework*. Lists of “illustrative knowledge” under “Significant Topics” have been kept to a minimum. Teachers should feel free to add or delete illustrative information as they please.
- For purposes of readability and continuity, some of the information from the *AP[®] United States History Curriculum Framework* has been slightly edited. The information from the *AP[®] United States History Curriculum Framework* has sometimes also been rearranged so that it can be taught in somewhat the same chronological order that is found in most textbooks.
- Teachers may want to take some of the “numbered” topics listed under “Significant Topics” and explore those topics in depth. Topics not explored in depth should at least be introduced and briefly explained to students.
- All “numbered” information under “Significant Topics” that is taken from the *AP[®] United States History Curriculum Framework* is noted in parentheses. (Something marked “2.1-IIA,” for example, indicates it was taken from Period 2, Key Concept 1, IIA) In rare cases, information with a parenthetical reference appears as illustrative knowledge and is marked with a “✓.”
- Any “lettered” information under “Significant Topics” marked with a “✓” is required information according to the *AP[®] United States History Curriculum Framework*. This information is not optional content and should not be left out of the curriculum.

Period 1: 1491-1607

In a Nutshell

On a North American continent controlled by American Indians, contact among the peoples of Europe, the Americas, and West Africa created a new world.

Key Concepts

Significant Topics

1. Economic Development and Social Diversification Among Native Societies

The spread of maize (corn) cultivation from present-day Mexico northward into the American Southwest and beyond supported economic development and social diversification among societies in these areas; a mix of foraging and hunting did the same for societies in the Northwest and areas of California. (1.1-IA)

a. Pueblo

A name for the Native Americans of the present-day southwestern United States. Pueblos were also apartment-like structures made of adobe and mud that formed the “towns” of the Pueblo people.

Native societies responded to the lack of natural resources in the Great Basin and the western Great Plains by developing largely mobile lifestyles. (1.1-IB)

3. **Native Societies in the Northeast and Atlantic Seaboard**

In the Northeast and along the Atlantic Seaboard some societies developed a mixed agricultural and hunter–gatherer economy that favored the development of permanent villages. (1.1-IC)

- a. Iroquois
Native Americans living in the present-day northeastern United States.

- b. Algonquin
Native Americans found living over a large area from the the Atlantic coast to the Great Lakes.

4. **Spanish and Portuguese Exploration and Conquest**

- a. ✓ **Columbian Exchange**
The exchange of people, plants, and animals between Europe, Africa, and North America that occurred after Columbus's arrival in the Western Hemisphere.

7. Indian Labor and African Slavery in the Spanish Colonies

In the economies of the Spanish colonies, Indian labor, used in the *encomienda* system to support plantation-based agriculture and extract precious metals (e.g., silver), and other resources (e.g., sugar), was gradually replaced by African slavery. (1.2-ID)

- a. ✓ **encomienda system**
Spanish system to regulate and control Native Americans. The Spanish crown granted Spanish colonists a specified number of natives for whom they were to take responsibility.

- d. **Walter Raleigh**
Englishman who sponsored the failed attempt to establish an English colony at Roanoke.
- e. **Roanoke, 1586**
First attempt by the English to establish a colony in America. The settlers on Roanoke Island, which is located off the coast of North Carolina, managed badly and when an expedition with supplies arrived in 1590, the colonists were gone. What happened to the colonists remains a mystery.

9. European Economics in the New World

New crops (e.g., corn and potatoes) from the Americas stimulated European population growth, while new sources of mineral wealth facilitated the European shift from feudalism to capitalism. (1.2-IIB)

10. Developments Making Colonization Possible

Improvements in technology and more organized methods for conducting international trade helped drive changes to economies in Europe and the Americas. (1.2-IIC)

- a. sextant
An instrument used to measure the angle between a celestial object and the horizon that became essential to navigation at sea.
- b. joint stock companies
Businesses owned by shareholders that invested in exploration and colonization.

11. **Treatment of Native Americans**

With little experience dealing with people who were different from themselves, Spanish and Portuguese explorers poorly understood the native peoples they encountered in the Americas, leading to debates over how American Indians should be treated and how “civilized” these groups were compared to European standards. (1.3-IA)

The Spanish network of missions in the New World established to bring Christianity to native Americans who were required to learn the Spanish languages, as well as Christian teachings.
- b. Juan de Oñate

- a. Maroons
African refugees who had escaped slavery in the Americas and developed their own communities in Brazil and the Caribbean.

b. African American Religion

African slaves mixed African beliefs and practices with Catholic rituals and theology, resulting in the formation of entirely new religions such as vaudou in Haiti (later referred to as "voodoo"), Santería in Cuba, and Candomblé in Brazil.

Additional Information

Topic Number

- #10—Developments Making Colonization Possible
- #11—Treatment of Native Americans

Period 2: 1607-1754

In A Nutshell

Europeans and American Indians maneuvered and fought for dominance, control, and security in North America, leading to the emergence of distinctive colonial and native societies.

Key Concepts

Part 1

- A. Differences in imperial goals, cultures, and the North American environments that different empires confronted led Europeans to develop diverse patterns of colonization. (2.1)
- B. Seventeenth-century Spanish, French, Dutch, and British colonizers embraced different social and economic goals, cultural assumptions, and folkways, resulting in varied models of colonization. (2.1-I) (WXT-2) (PEO-1) (WOR-1) (ENV-4)
- C. The British-American system of slavery developed out of the economic, demographic, and geographic characteristics of the British-controlled regions of the New World. (2.1-II) (WOR-1) (WXT-4) (ID-4) (POL-1) (CUL-1)
- D. Along with other factors, environmental and geographical variations, including climate and natural resources, contributed to regional differences in what would become the British colonies. (2.1-III) (WXT-2) (WXT-4) (ENV-2) (ID-5) (PEO-5) (CUL-4)

Part 2

- E. European colonization efforts in North America stimulated intercultural contact and intensified conflict between the various groups of colonizers and native peoples. (2.2)
- F. Competition over resources between European rivals led to conflict within and between North American colonial possessions and American Indians. (2.2-I) (WXT-1) (PEO-1) (WOR-1) (POL-1) (ENV-1)
- G. Clashes between European and American Indian social and economic values caused changes in both cultures. (2.1-II) (ID-4) (WXT-1) (PEO-4) (PEO-5) (POL-1) (CUL-1)

Part 3

- H. The increasing political, economic, and cultural exchanges within the “Atlantic World” had a profound impact on the development of colonial societies in North America. (2.3)
- I. “Atlantic World” commercial, religious, philosophical, and political interactions among Europeans, Africans, and American native peoples stimulated economic growth, expanded social networks, and reshaped labor systems. (2.3-I) (WXT-1) (WXT-4) (WOR-1) (WOR-2) (CUL-4)
- J. Britain’s desire to maintain a viable North American empire in the face of growing internal challenges and external competition inspired efforts to strengthen its imperial control, stimulating increasing resistance from colonists who had grown accustomed to a large measure of autonomy. (2.3-II) (WOR-1) (WOR-2) (ID-1) (CUL-4)

Significant Topics

- 1. **Spanish Colonization in the Western Hemisphere**
Spain sought to establish tight control over the process of colonization and to convert and/or exploit the native population. (2.1-IA)

2. **French and Dutch Colonization in the Western Hemisphere**
French and Dutch colonial efforts involved relatively few Europeans and used trade alliances and intermarriage with American Indians to acquire furs and other products for export to Europe. (2.1-IB)
3. **English Colonization in the Western Hemisphere**
Unlike their European competitors, the English eventually sought to establish colonies based on agriculture, sending relatively large numbers of men and women to acquire land and populate their settlements, while having relatively hostile relationships with American Indians. (2.1-IC)
4. **European Intermarriage with Native Americans and Africans**
Unlike Spanish, French, and Dutch colonies, which accepted intermarriage and cross-racial sexual unions with native peoples (and, in Spain's case, with enslaved Africans), English colonies attracted both males and females who rarely intermarried with either native peoples or Africans, leading to the development of a rigid racial hierarchy. (2.1-IIA)
5. **Atlantic Slave Trade**
The abundance of land, a shortage of indentured servants, the lack of an effective means to enslave native peoples, and a growing European demand for colonial goods led to the emergence of the Atlantic slave trade. (2.1-IIB)
 - a. indentured servitude
System of labor in which a company or individual paid a person's passage to America in return for a contract of repayment through servitude (usually seven years).
 - b. middle passage
Route followed by indentured servants and slaves across the Atlantic to America.
6. **Slavery in the British Colonies**
Reinforced by a strong belief in British racial and cultural superiority, the British system enslaved black people in perpetuity, altered African gender and kinship relationships in the colonies, and was one factor that led the British colonists into violent confrontations with American Indians. (2.1-IIC)
 - a. First Africans brought to America, 1619
A Dutch ship brought 20 Africans to Virginia, the first Africans to arrive in the present-day United States. Until 1680, indentured servants from Europe were far more numerous in the English colonies than African slaves. After 1680, the number of indentured migrants from Europe diminished and African slavery increased.
7. **African Resistance to British Slavery**
Africans developed both overt and covert means to resist the dehumanizing aspects of slavery. Resistance to slavery included rebellion, sabotage, and escape. (2.1-IID)
 - a. Stono Rebellion, 1739
South Carolina slave revolt that prompted the colonies to pass stricter laws regulating the movement of slaves and the capture of runaways.
 - b. New York Conspiracy, 1741
A plot by slaves and poor whites to burn New York. Over 170 people were arrested for participating in the plot. Most were hanged, burnt, or deported.

8. New England Colonies

The New England colonies, founded primarily by Puritans seeking to establish a community of like-minded religious believers, developed a close-knit, homogeneous society and — aided by favorable environmental conditions — a thriving mixed economy of agriculture and commerce. (2.1-III A)

a. Great Migration to Massachusetts, 1630-1640

Beginning with 700 people led by Governor John Winthrop, a great migration of Puritans from England brought over 20,000 people—mostly families— to New England over a ten-year period.

b. ✓ Puritans

English Protestants who wanted to create a “community of saints” or “city upon a hill” that would serve as a model of Christianity.

c. Providence, Rhode Island, 1636

Founded by Roger Williams who had led a small group of colonists out of Massachusetts. Rhode Island was the first English colony to establish separation of church and state, granting complete religious freedom.

9. Middle Colonies

The demographically, religiously, and ethnically diverse middle colonies supported a flourishing export economy based on cereal crops, while the Chesapeake colonies and North Carolina relied on the cultivation of tobacco, a labor-intensive product based on white indentured servants and African chattel. (2.1-III B)

a. ✓ Chesapeake

Common term for the two colonies of Maryland and Virginia, both of which border on Chesapeake Bay.

b. Pennsylvania, 1682

Founded by William Penn, who received a colonial charter from King Charles II in payment of a debt owed to Penn’s father. Penn established Pennsylvania as a haven for Quakers, guaranteeing liberty of conscience and granting freemen the right to alter the government.

c. Quakers

Religious group that settled Pennsylvania. Often known as the “Society of Friends,” Quakers believed in an “Inner Light” that would guide them toward religious truth.

10. Southern and British West Indies Colonies

The colonies along the southernmost Atlantic coast and the British islands in the West Indies took advantage of long growing seasons by using slave labor to develop economies based on staple crops; in some cases, enslaved Africans constituted the majority of the population. (2.1-III C)

a. Jamestown, 1607

The first permanent English settlement in North America. Located in Virginia, the colony was founded by more than 100 colonists dispatched by the London Company. After a period known as the “starving time,” John Smith provided the leadership needed to make the colony successful.

b. headright system

The grant of 50 acres of land for each settler brought to Virginia by a colonist.

- c. Georgia, 1732

Founded by James Oglethorpe as a haven for debtors, Georgia became the last of the original 13 British colonies in North America.

11. European Conflicts in the New World

Conflicts in Europe spread to North America, as French, Dutch, British, and Spanish colonies allied, traded with, and armed American Indian groups, leading to continuing political instability. (2.2-1 A) As European nations competed in North America, their colonies focused on gaining new sources of labor and on producing and acquiring commodities such as furs and tobacco, that were valued in Europe. (2.2-1B)

- a. Beaver Wars

A series of wars in the mid-1600s in which the Iroquois, who allied with the English and Dutch, fought the Huron and Algonquin tribes, who were backed by the French. The wars were fought over land and the monopolization of the fur trade.

- b. Chickasaw Wars

War in the 1700s between the Chickasaw, allied with the British, against the French, who were allied with the Choctaw and Illini. The war was fought over land, primarily for control of the Mississippi River.

12. Colonial Dissatisfaction with European Nations

The goals and interests of European leaders at times diverged from those of colonial citizens, leading to growing mistrust on both sides of the Atlantic, as settlers, especially in the English colonies, expressed dissatisfaction over territorial settlements, frontier defense, and other issues. (2.2-1C)

- a. Wool Act, 1699

English law that made it illegal to ship wool from the American colonies. The law was designed to assist the British wool industry.

- b. Molasses Act, 1733

A British law that established a tax on imports of molasses, sugar, and rum from non-British colonies. The law was loosely enforced and New England imported great quantities of West Indian sugar for manufacturing rum.

- c. smuggling

As a way of ignoring British restrictions on colonial trade, colonists engaged in widespread smuggling. Smugglers who got caught were often freed by sympathetic American juries.

13. European Contact with Native Populations

Continuing contact with Europeans increased the flow of goods and diseases into and out of native communities, stimulating cultural and demographic changes. (2.2-1IA) By supplying American Indian allies with deadlier weapons and alcohol, and by rewarding Indian military actions, Europeans helped increase the intensity and destructiveness of American Indian warfare. (2.2-1IC)

- a. King Philip's War, 1675-1676

The last significant effort by the Indians of southern New England to drive away English settlers. The Indians were led by Metacom, the Pokunoket chief whom English settlers called "King Philip."

- b. Pueblo Revolt, 1680
An uprising of Indians in Santa Fe against Spanish colonization.

14. European Response to Native Culture

Spanish colonizing efforts in North American, particularly after the Pueblo Revolt, saw an accommodation with some aspects of American Indian culture; by contrast, conflict with American Indians tended to reinforce English colonists' worldview on land and gender roles. (2.2-IIB)

15. Colonial Attitudes about Race

The presence of slavery and the impact of colonial wars stimulated the growth of ideas on race in this Atlantic system, leading to the emergence of racial stereotyping and the development of strict racial categories among British colonists, which contrasted with Spanish and French acceptance of racial gradations. (2.3-IC)

- a. *Casta* system
A system in colonial Spain of determining a person's social importance according to different racial categories.
- b. mulatto
A person who had one parent who was white and another parent who was black. If mulattos were born into slavery in a Spanish colony (i.e., their mother was a slave), they would be slaves also, but if their mother was free, they were free.
- c. Métis
A person of mixed race who had one white parent and another parent who was American Indian.

16. The Atlantic Economy

The growth of an Atlantic economy throughout the 18th century created a shared labor market and a wide exchange of New World and European goods, as seen in the African slave trade and the shipment of products from the Americas. (2.3-IA)

- a. mercantilism
Economic system based on trade in which a nation establishes colonies for its own economic benefit.
- b. triangular trade
A system of trade between Africa, the Caribbean, and American colonies that involved slaves, cash crops, and manufactured goods.

17. Anglicization of the British Colonies

Several factors promoted Anglicization in the British colonies: the growth of autonomous political communities based on English models, the development of commercial ties and legal structures, the emergence of a trans-Atlantic print culture, Protestant evangelism, religious toleration, and the spread of European Enlightenment ideas. (2.3-IB)

- a. House of Burgesses, 1619
An elected lawmaking body, established by the Virginia Company to allow representative government in Virginia.
- b. Mayflower Compact, 1620
The first social contract for a New England colony. Drafted and signed by 41 adult male Separatists fleeing religious persecution by King James of England. Granted political rights to all male colonists who would abide by the colony's laws.
- c. Maryland Toleration Act, 1649
A law passed by the Maryland colonial assembly mandating toleration for all trinitarian Christian denominations. (Maryland had been founded in 1632 by Cecilius Calvert as a haven for Catholics.)

18. Unification of the British Colonies

As regional distinctiveness among the British colonies diminished over time, they developed largely similar patterns of culture, laws, institutions, and governance within the context of the British imperial system. (2.3-IIA)

- a. Establishment of the Dominion of New England, 1686
An attempt by King James II to place Massachusetts, Connecticut, Rhode Island, New Jersey, and New York under the control of one royal governor. Colonists viewed the Dominion as an attempt to take away their rights and the Dominion was dissolved in 1689.

#6—Abolition and the Rights of African Americans

#22—Federal vs. State Power

Period 5: 1844–1877

In a Nutshell

As the nation expanded and its population grew, regional tensions, especially over slavery, led to a civil war — the course and aftermath of which transformed American society.

Key Concepts

Part 1

- A. The United States became more connected with the world as it pursued an expansionist foreign policy in the Western Hemisphere and emerged as the destination for many migrants from other countries. (5.1)
- B. Enthusiasm for U.S. territorial expansion, fueled by economic and national security interests and supported by claims of U.S. racial and cultural superiority, resulted in war, the opening of new markets, acquisition of new territory, and increased ideological conflicts. (5.1-I) (ID-2) (WXT-2) (WOR-5) (WOR-6) (ENV-3) (ENV-4)
- C. Westward expansion, migration to and within the United States, and the end of slavery reshaped North American boundaries and caused conflicts over American cultural identities, citizenship, and the question of extending and protecting rights for various groups of U.S. inhabitants. (5.1-II) (ID-6) (WXT-6) (PEO-2) (PEO-5) (PEO-6) (POL-6)

Part 2

- D. Intensified by expansion and deepening regional divisions, debates over slavery and other economic, cultural, and political issues led the nation into civil war. (5.2)
- E. The institution of slavery and its attendant ideological debates, along with regional economic and demographic changes, territorial expansion in the 1840s and 1850s, and cultural differences between the North and the South, all intensified sectionalism. (5.2-I) (ID-5) (POL-3) (POL-5) (POL-6) (CUL-2) (CUL-6)
- F. Repeated attempts at political compromise failed to calm tensions over slavery and often made sectional tensions worse, breaking down the trust between sectional leaders and culminating in the bitter election of 1860, followed by the secession of southern states. (5.2-II) (POL-2) (POL-6) (PEO-5) (ID-5)

Part 3

- G. The Union victory in the Civil War and the contested Reconstruction of the South settled the issues of slavery and secession, but left unresolved many questions about the power of the federal government and citizenship rights. (5.3)
- H. The North's greater manpower and industrial resources, its leadership, and the decision for emancipation eventually led to the Union military victory over the Confederacy in the devastating Civil War. (5.3-I) (POL-5) (CUL-2) (ENV-3)
- I. The Civil War and Reconstruction altered power relationships between the states and the federal government and among the executive, legislative, and judicial branches, ending slavery and the notion of a divisible union, but leaving unresolved questions of relative power and largely unchanged social and economic patterns. (5.3-II) (POL-5) (POL-6) (ID-5)
- J. The constitutional changes of the Reconstruction period embodied a Northern idea of American identity and national purpose and led to conflicts over new definitions of citizenship, particularly regarding the rights of African Americans, women, and other minorities. (5.3-III) (ID-2) (POL-6)
